JOSHUA THOMAS

Data Analyst | **Kozhikode, India | +91 9207235922**

joshuathomas2722@gmail.com | LinkedIn | Portfolio

Career Objective

Data Analyst with hands-on experience in Excel, SQL, Python, Power BI and Tableau. Demonstrated ability to analyze complex datasets, develop data visualizations, and generate actionable business insights. Skilled in statistical analysis and model building, with a focus on solving real-world problems and improving operational efficiency. Eager to contribute to data-driven decision-making in dynamic business environments.

Technical Skills

- Languages & Tools: Python (Pandas, NumPy, Scikit-learn), SQL, Excel (Pivot Table, HLOOKUP, VLOOKUP)
- Visualization: Tableau, Matplotlib, Seaborn, Power BI, Tableau
- Data Analytics: Data Cleaning, Exploratory Data Analysis (EDA), Hypothesis Testing, Statistical Inference
- Machine Learning Models: Linear/Logistic Regression, Random Forest, Decision Trees, Gradient Boosting
- Databases: MySQL Workbench

Professional Skills

Problem Solving | Critical Thinking | Clear Communication | Attention to Detail | Team Collaboration

Experience

- **Counselling Coordinator** | April 2024 – September 2025

  Fair Future Overseas Educational Consultancy Pvt Ltd.
  - Managed structured client inquiry data using spreadsheets for streamlined decision-making.
  - Maintained records of daily inquiries, improving access to key client information for senior executives.
  - Collaborated with the internal team to optimize data logs, resulting in a 20% increase in client response efficiency.

Academic Projects

- **Email Marketing Campaign –** Power BI Dashboard
  - Built an interactive dashboard to evaluate customer engagement, campaign effectiveness, and conversion outcomes.
  - Created calculated columns and measures using **DAX** to derive meaningful marketing metrics.
  - Identified high-performing and underperforming campaigns based on engagement and conversion metrics.
  - Tools: Power BI, Excel

- **Health Care Project** - Insurance Premium Prediction
  - Built predictive models to estimate insurance premiums using demographic and health data.
  - Gradient Boosting achieved R^2 score of **95.7%**, outperforming other models in minimizing prediction error.
  - Tools: Python (Scikit-learn), Excel, EDA
- **Car Insurance Claim Analysis** - Fraud Detection
  - Analyzed claims data and developed interactive dashboards in **Tableau** to visualize fraud patterns.
  - Insights supported fraud prevention policy updates by management.
  - Tools: Python, Excel, Tableau
- **Company Bankruptcy Analysis** - Risk Prediction
  - Implemented Random Forest model with **65.3%** accuracy, Recall: **38.5**%, F1 Score: **31.8**% to predict bankruptcy risk.
  - Assisted stakeholders in early identification of high-risk companies.
  - Tools: Python (Logistic Regression, Random Forest), Excel

Education

BSc Botany (Apr 2022) - ***University of Calicut***

Post Graduate Program in Data Science and Business Analytics (*Texas McCombs, University of Texas at Austin*- Online Nov 2023- Nov 2024) - ***Great Learning***

Data Analytics Course - ***Rows and columns*** *(Calicut)* - (Oct 2025- Feb *2026*)

Certificates

- Certification in Generative AI- Great Learning (Online- 2025)
