

Joshua Thomas

Data Analyst | Kozhikode, India | +91 9207235922 | joshuathomas2722@gmail.com | LinkedIn | Portfolio | GitHub

Professional Summary

Detail-oriented Data Analyst with expertise in data analysis, data visualization, and dashboard development using **Python, SQL, Excel, Power BI, and Tableau**. Experienced in analyzing large datasets, building dashboards, and generating actionable insights to support data-driven decision-making. Skilled in data cleaning, KPI reporting, statistical analysis, and business intelligence. Proficient in identifying trends, performing data validation, and improving business performance through analytics. Passionate about leveraging data to solve real-world business problems and improve operational efficiency across industries.

Technical Skills & Tools

- Core Competencies: Data Analysis, Data Visualization, Dashboard Development, KPI Reporting, Business Intelligence
- Languages & Tools: Python (Pandas, NumPy, Scikit-learn), SQL, Excel (Pivot Table, HLOOKUP, VLOOKUP, XLOOKUP)
- Data Visualization: Tableau, Matplotlib, Seaborn, Power BI
- Data Analytics: Data Cleaning, Exploratory Data Analysis (EDA), Hypothesis Testing, Statistical Inference
- Machine Learning Models: Linear/Logistic Regression, Random Forest, Decision Trees, Gradient Boosting
- Databases: MySQL Workbench

Professional Skills

Analytical Thinking | Data Interpretation | Problem Solving | Stakeholder Communication | Business Analysis | Attention to Detail | Data Storytelling | Insight Generation

Professional Experience

Fair Future Overseas Educational Consultancy Pvt Ltd.

April 2024 – September 2025

Counselling Coordinator

- Analyzed and managed structured client inquiry data using Excel to support reporting and data-driven decision-making.
- Maintained and updated datasets, ensuring data accuracy and enabling efficient reporting for senior stakeholders.
- Collaborated with cross-functional teams to optimize data tracking processes, improving client response efficiency by **20%**.

Academic Projects

Email Marketing Campaign – Power BI Dashboard

- Developed an interactive dashboard to analyze customer engagement, track KPIs, and evaluate campaign performance.
- Created calculated columns and measures using **DAX** formula language to derive meaningful marketing metrics.
- Identified high-performing and underperforming campaigns based on engagement and conversion metrics.
- Tools: Power BI, Excel

Health Care Project - Insurance Premium Prediction

- Built predictive models to estimate insurance premiums based on customer health, lifestyle, and demographic data.
- Gradient Boosting achieved R^2 score of **95.7%**, helping identify key risk factors and deliver personalized insurance pricing.
- Tools: Python (Scikit-learn), Excel, EDA

Car Insurance Claim Analysis - Fraud Detection

- Analyzed claims data and developed interactive **dashboards** in Tableau to visualize key trends and fraud patterns.
- Insights culminated in a concise summary and actionable recommendations supported fraud prevention policy updates by management.
- Tools: Python, Excel, Tableau

Company Bankruptcy Analysis - Risk Prediction

- Implemented Random Forest model with **65.3%** accuracy, Recall: **38.5%**, F1 Score: **31.8%** to predict bankruptcy risk.
- Predicted company default likelihood based on net worth, facilitating proactive risk management decisions.
- Tools: Python (Logistic Regression, Random Forest), Excel

Education

BSc Botany - *University of Calicut*

April 2022

Post Graduate Program in Data Science and Business Analytics (*Texas McCombs, University of Texas at Austin*- Online) - *Great Learning*

November 2024

Certifications & Training

- Data Analytics Course – Rows and Columns **Feb 2026**
- Certification in Generative AI- Great Learning (Online) **April 2025**
