

JOSHUA THOMAS

DATA & AI OPERATIONS ANALYST

Kozhikode, India | +91 9207235922 | joshuathomas2722@gmail.com | [linkedin.com/in/joshua-thom27](https://www.linkedin.com/in/joshua-thom27) | GitHub

PROFESSIONAL SUMMARY

Data and AI operations professional with hands-on experience supporting enterprise learning programs, Microsoft Copilot and GitHub Copilot adoption, Power Platform automation, learning analytics, and stakeholder coordination. Skilled in Power BI, Excel, Python, SQL, Tableau, Power Automate, and Copilot Studio, with experience converting attendance, enrollment, feedback, and operational data into structured reporting and actionable insights. Combines data analysis capabilities with program execution, use-case documentation, workflow design, and professional communication to improve learning operations and AI adoption.

CORE SKILLS

DATA & BI Power BI, Excel, SQL, Python, Tableau, DAX, Power Query, KPI Reporting, EDA	AI & AUTOMATION Microsoft 365 Copilot, GitHub Copilot, Power Automate, Copilot Studio, AI Agents	OPERATIONS Training Coordination, Learning Analytics, Attendance & Completion Tracking, Feedback Analysis
PROGRAM DELIVERY Learner Onboarding, Meeting Logistics, Reminders, Use-Case Collection, Documentation	ANALYTICS METHODS Data Cleaning, Validation, Statistical Analysis, Predictive Modeling, Dashboard Development	PROFESSIONAL Stakeholder Communication, Process Documentation, Problem Solving, Data Storytelling

PROFESSIONAL EXPERIENCE

KPIT Technologies Limited <i>Trainee - ECoDe AI Operations & Learning Enablement</i>	Apr 2026 - Aug 2026
• Coordinate AI learning and adoption initiatives covering Microsoft 365 Copilot, GitHub Copilot, Power Automate, Copilot Studio, and AI Agents. • Manage learner onboarding, nominations, attendance, enrollment and completion tracking, reminders, feedback collection, and status reporting for technical enablement programs. • Coordinate session calendars, meeting invitations, trainers, learners, leaders, and cross-functional stakeholders across business teams and global cohorts. • Collect, organize, track, and consolidate AI use-case submissions and supporting documentation; follow up with participants and support evaluation readiness. • Transform attendance, enrollment, feedback, and operational data into structured analysis, learning-hour reporting, dashboards, and stakeholder updates. • Design and document a Microsoft Power Automate workflow for post-session attendance and learning-hours analysis, replacing a manual formula-driven process with a repeatable, standardized output. • Develop implementation guidance for an attendance-analysis solution using Power Automate, Office Scripts, Excel Online, OneDrive, and SharePoint logging. • Support intelligent reporting and knowledge-retrieval concepts using Microsoft Copilot Studio and AI agents, while maintaining clear process and requirement documentation.	
Fair Future Overseas Educational Consultancy Pvt. Ltd. <i>Counselling Coordinator</i>	Apr 2024 - Sep 2025
• Managed client data in CRM systems and Excel, ensuring accurate tracking of leads, inquiries, and follow-ups. • Analyzed customer interactions and sales-pipeline metrics to support business decisions and performance evaluation. • Collaborated with cross-functional teams to optimize data-tracking processes, improving client response efficiency by 20%. • Generated periodic reports on client acquisition, conversion rates, and engagement metrics for senior management.	

PROJECTS

Automated Session Attendance & Learning Hours Analysis - KPIT Academy

- Designed requirement and build documentation for a governed Power Automate workflow that prepares standardized post-session attendance and learning-hours analysis. Solution design covers data acquisition, transformation, enrichment, output generation, error handling, testing, and governance.

Tools: Power Automate, Office Scripts, Excel Online, OneDrive, SharePoint

Email Marketing Campaign - Power BI Dashboard

- Developed an interactive dashboard to analyze customer engagement, track KPIs, evaluate campaign performance, and identify high- and under-performing campaigns using calculated columns and DAX measures.

Tools: Power BI, DAX, Excel

Insurance Premium Prediction

- Built predictive models from health, lifestyle, and demographic data. Gradient Boosting achieved an R^2 score of 95.7% and supported identification of key premium risk factors.

Tools: Python, Scikit-learn, Excel, EDA

Car Insurance Claim Analysis - Fraud Detection

- Analyzed insurance claims and created Tableau dashboards to visualize trends and fraud patterns, then summarized findings and recommendations.

Tools: Python, Excel, Tableau

Company Bankruptcy Analysis - Risk Prediction

- Implemented a Random Forest model with 65.3% accuracy, 38.5% recall, and 31.8% F1 score to estimate bankruptcy risk from company financial indicators.

Tools: Python, Logistic Regression, Random Forest, Excel

EDUCATION

Post Graduate Program in Data Science and Business Analytics

Nov 2024

Great Learning | Texas McCombs, The University of Texas at Austin - Online

BSc Botany, University of Calicut

Apr 2022

CERTIFICATIONS & TRAINING

Data Analytics Course - Rows and Columns

Feb 2026

Certification in Generative AI - Great Learning

Apr 2025

GitHub Copilot, Draft analyze, and present with Microsoft 365 Copilot – Microsoft Learn

Jul 2026

Generative AI for Everyone – DeepLearning.AI (Coursera)

Aug 2026
