PROFESSIONAL SUMMARY

Data and AI Operations professional with experience in data analysis, reporting, data validation, learning analytics, and business operations. Skilled in SQL, Power BI, Excel, Python, Tableau, Power Automate, and Copilot Studio, with experience analyzing CRM, lead, attendance, enrollment, feedback, conversion, and engagement data to generate actionable insights and performance reports. Experienced in data accuracy, trend analysis, workflow automation, Microsoft Copilot and GitHub Copilot adoption, process improvement, and stakeholder coordination, with strong ability to translate data into clear business insights.

PROFESSIONAL EXPERIENCE

KPIT Technologies Limited

Apr 2026 – Aug 2026

Trainee - ECoDe / AI Operations & Learning Enablement

- Coordinate AI learning and adoption initiatives covering Microsoft 365 Copilot, GitHub Copilot, Power Automate, Copilot Studio, and AI Agents.
- Manage learner onboarding, nominations, attendance, enrollment and completion tracking, reminders, feedback collection, and status reporting for technical enablement programs.
- Coordinate session calendars, meeting invitations, trainers, learners, leaders, and cross-functional stakeholders across business teams and global cohorts.
- Collect, organize, track, and consolidate AI use-case submissions and supporting documentation; follow up with participants and support evaluation readiness.
- Transform attendance, enrollment, feedback, and operational data into structured analysis, learning-hour reporting, dashboards, and stakeholder updates.
- Design and document a Microsoft Power Automate workflow for post-session attendance and learning-hours analysis, replacing a manual formula-driven process with a repeatable, standardized output.
- Develop implementation guidance for an attendance-analysis solution using Power Automate, Office Scripts, Excel Online, OneDrive, and SharePoint logging.
- Support intelligent reporting and knowledge-retrieval concepts using Microsoft Copilot Studio and AI agents, while maintaining clear process and requirement documentation.

Fair Future Overseas Educational Consultancy Pvt. Ltd.

Apr 2024 - Sep 2025

Counselling Coordinator / CRM & Sales Operations

- Managed customer and CRM data in Excel and CRM systems, maintaining accurate records of leads, inquiries, follow-ups, and customer interactions.
- Analyzed sales-pipeline metrics, customer interactions, conversion rates, and engagement data to support business decisions and performance evaluation.
- Generated periodic MIS-style reports covering client acquisition, conversion performance, and engagement metrics for senior management.
- Performed data tracking and validation activities to improve the accuracy and completeness of customer and sales information.
- Collaborated with cross-functional teams to improve data-tracking processes, contributing to a 20% improvement in client response efficiency.
- Monitored customer follow-ups and pipeline activity to support effective account and customer management.

CORE SKILLS

DATA & BI

Power BI, Excel, SQL, Python, Tableau, DAX, Power Query, KPI Reporting, EDA

AI & AUTOMATION

Microsoft 365 Copilot, GitHub Copilot, Power Automate, Copilot Studio, AI Agents

OPERATIONS

CRM Data Management, Lead & Inquiry Tracking, Follow-up Management, Customer Data Analysis, Process Documentation, Operational Reporting, Training Coordination, Learning Analytics, Attendance & Completion Tracking, Feedback Analysis

PROGRAM DELIVERY	ANALYTICS METHODS	PROFESSIONAL
Learner Onboarding, Meeting Logistics, Reminders, Use-Case Collection, Documentation	Data Cleaning, Validation, Statistical Analysis, Predictive Modeling, Dashboard Development	Stakeholder Communication, Process Documentation, Problem Solving, Data Storytelling

PROJECTS

Automated Session Attendance & Learning Hours Analysis - KPIT Academy

- Designed requirement and build documentation for a governed Power Automate workflow that prepares standardized post-session attendance and learning-hours analysis. Solution design covers data acquisition, transformation, enrichment, output generation, error handling, testing, and governance.

Email Marketing Campaign - Power BI Dashboard

- Developed an interactive dashboard to analyze customer engagement, track KPIs, evaluate campaign performance, and identify high- and under-performing campaigns using calculated columns and DAX measures.

Insurance Premium Prediction

- Built predictive models from health, lifestyle, and demographic data. Gradient Boosting achieved an R^2 score of 95.7% and supported identification of key premium risk factors.

Car Insurance Claim Analysis - Fraud Detection

- Analyzed insurance claims and created Tableau dashboards to visualize trends and fraud patterns, then summarized findings and recommendations.

Company Bankruptcy Analysis - Risk Prediction

- Implemented a Random Forest model with 65.3% accuracy, 38.5% recall, and 31.8% F1 score to estimate bankruptcy risk from company financial indicators.

EDUCATION

Post Graduate Program in Data Science and Business Analytics <i>Great Learning Texas McCombs, The University of Texas at Austin - Online</i>	Nov 2024
BSc Botany, University of Calicut	Apr 2022

CERTIFICATIONS & TRAINING

- Data Analytics Course - Rows and Columns | Feb 2026
- Certification in Generative AI - Great Learning | Apr 2025
- Microsoft Certifications: GitHub Copilot | July 2026
- Microsoft Certifications: Draft analyze, and present with Microsoft 365 Copilot | July 2026
- Generative AI for Everyone – DeepLearning.AI (Coursera) | Aug 2026
